

SNAP REPLACEMENT OF STOLEN BENEFITS

There are two different ways to download the state replacement of stolen benefits data: the Dashboard Export Data button or the Stolen Benefit Data CSV link. There are no differences between the exported data.

Downloading Dashboard Data Using Export Data Button

The Export Data button, located in the upper right-hand corner of the Dashboard, allows users to download and export the state data reported to FNS. Once Export Data is clicked, the user will be prompted to save the SNAP Stolen Benefit Data by State Excel file.

The downloaded data will consist of all states stolen benefit data for each quarter reported since their implementation plan. Therefore, a state can have multiple rows of data based on the Reporting Timeframe.

Downloading State Data Using CSV Link

The CSV link, located at the bottom of the webpage below the Dashboard, allows users to download and export the state reported data. Once the CSV link is clicked, the user will be prompted to save the SNAP Stolen Benefit Data by State file.
