 - §7 CFR 273.2 (f) (9) Mandatory use of IEVS. State's must obtain information through IEVS.
8. **Description of alternative procedures:**

On 3/21/20, Minnesota requested a waiver to extend recertification dates by 6 months and suspend reporting requirements for other households during the pandemic. This allows MN eligibility staff to focus on new applications.

For new applications. Individuals who request assistance over the phone will have their applications completed, and interview held by the eligibility worker at the time

of the call. The application date will be the date the phone interview takes place, which will be the same day the application is completed by eligibility staff. Many households do not have access to the internet, and as human service offices continue to close, households need easy access to benefits. MN still expects to receive applications via drop-box, mail, fax and electronically via ApplyMN. There will be no change to benefit start date when applications are received under normal processes. However, if a signature is missing on either the first page (sets date of eligibility) or last page (attesting to accuracy of application) eligibility staff will allow a verbal signature, note on the application and enter a case note in MAXIS, Minnesota's eligibility system.

MN will use client statements as primary source of verification for applicants whose employment has been impacted by the COVID-19 virus. Governor Walz signed Executive Order #20-04 to order the temporary closure of MN restaurants, and bars. On March 18, he signed Executive Order #20-08 clarifying the other types of businesses subject to closure, including salons and establishments that provide the following services: haircuts & styling, tanning, body art, tattoos, piercing, nails, cosmetology, estheticians, and eyelash salons. Applicants who indicate they work in the industries identified in the executive order, or indicate they lost their job, or hours were reduced due to COVID-19, will be able to self-attest to their employment, income status and other eligibility factors. Eligibility staff will take a verbal statement, and document the statement in case notes, on the application form, or possibly a template

Verification of identity, social security numbers, alien status and income from the Social Security Administration (SSI, RSDI for example) will continue to be verified per current MN policy. For example, SSN's, SSI and RSDI income can be verified using MN's State data exchange with the Social Security Administration. Alien status can be verified using the SAVE system.

After initial approval of SNAP benefits, MN would like to suspend the use of the Income Eligibility Verifications System, which will generate thousands of "hits" for jobs that may have been lost after Governor Walz ordered bars, restaurants and other non-essential establishments to close on March 16, 2020. Staff time is better spent getting benefits out quickly to meet the increased demand for benefits during this crisis.

For new applications, recertifications will be set at 12 months which is current MN policy.

9. Justification for request:

This request is justified pursuant to the Families First Coronavirus Response Act and 7 CFR 272.3(c) (1)(ii) which permits FNS to authorize waivers that result in a more effective and efficient administration of the program. The approval of this waiver extension would allow MNDHS to ensure Minnesota can respond quickly to the increase in demand for SNAP benefits as a result of this health crisis.

10. Anticipated impact on households and State agency operations:

This waiver will allow new applications for SNAP benefits to be approved quickly. The Minnesota Department of Employment and Economic Development (DEED) has received over 95,000 applications for unemployment insurance in the last roughly 7 days. MN expects many of the same households may apply for SNAP. Focusing on new applications will help ensure benefits flow quickly to households with swift approval processes.

11. Caseload information:

Minnesota currently serves 370,313 SNAP household members and 193,005 households (cases) as of February 1, 2020.

12. Anticipated implementation date and time period for which waiver is needed:

Immediately until the COVID-19 health crisis has passed.

13. Proposed quality control review procedures:

MN requests hold-harmless provisions for all waivers approved by USDA.
