**TO:** Jesus Mendoza, Jr.  
Regional Administrator  
Western Regional Office

This letter is in response to the March 24, 2021 correspondence from Washington FMNP requesting program flexibility in the WIC Farmers' Market Nutrition Program (FMNP) as a result of significant impacts to providing eligible foods to recipients due to COVID-19.

Washington FMNP requested a waiver of the requirement to conduct annual, on-site monitoring of at least 10 percent of farmers, 10 percent of farmers' markets and 10 percent of roadside stands which includes those farmers, farmers' markets and roadside stands identified as highest risk, as outlined at 7 CFR 248.10(e)(2) and 248.17(c)(1). Pursuant to the authority granted in section 2204(a)(1) of the Families First Coronavirus Response Act (P.L. 116-127), as amended, USDA's Food and Nutrition Service (FNS) approves this waiver request until 30 days after the end of the nationally-declared public health emergency under section 319 of the Public Health Service Act (42 U.S.C. 247d).

Given the recommendations by the Centers for Disease Control and Prevention to control the impact of the COVID-19 epidemic through means of social distancing, USDA FNS understands that on-site monitoring of farmers, farmers' markets and roadside stands requiring WIC employees to closely interact creates an undesirable risk. A waiver of the requirement for on-site monitoring reviews removes a requirement that the State agency cannot currently meet due to COVID-19.

This waiver is only applicable to the on-site requirement of the regulations at:

- 7 CFR 248.10(e)(2) and 248.17(c)(1), which require the State agency to conduct annual, on-site monitoring of at least 10 percent of farmers, 10 percent of farmers' markets and 10 percent of roadside stands which includes those farmers, farmers' markets and roadside stands identified as highest risk.

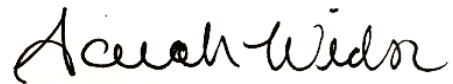

FNS encourages State agencies to conduct monitoring reviews to the maximum extent possible and consistent with State and local public health recommendations. This approval does not waive the requirement for the State agency to conduct annual monitoring reviews of participating farmers, farmers' markets and roadside stands or the requirement for the State agency to conduct monitoring reviews of all local agencies at least once every 2 years.

The waiver authority at section 2204(b) of P.L. 116-127 requires the State agency to submit a report which includes a summary of the use of these waivers and a description of whether the

waivers resulted in improved services to women, infants and children. The State agency shall provide the Regional Office with this report no later than 1 year after the date of approval.

USDA FNS appreciates Washington FMNP's commitment to addressing the operational challenges impeding the delivery of WIC benefits to women, infants and children in need.

Sincerely,

A handwritten signature in black ink that reads "Sarah Widor". The signature is written in a cursive style with a large initial "S" and a long, sweeping underline.

SARAH WIDOR
