

Food and Nutrition Service

U.S. DEPARTMENT OF AGRICULTURE

Supplement C: Acknowledgements

This report was prepared by Mathematica under contract 12319819A0009/12319819F0162 for the U.S. Department of Agriculture (USDA) Food and Nutrition Service (FNS). Many people within and beyond these organizations assisted us. At FNS, Darcy G ng r monitored each project task and provided valuable guidance along with Susannah Barr and Conor McGovern and their thoughtful and dedicated colleagues in the Evidence, Analysis, and Regulatory Affairs Office and Child Nutrition Program Office.

At Mathematica, survey staff Myah Scott, Katherine Niland, and Joshua Holbrook administered the school food authority (SFA) and State agency surveys. Frederick Kiesche, Luke McDonald, Mansi Gala, Isaac Rosenthal, Tong Li, Ann Shinefeld, and David Naglee programmed the surveys. Jacqueline Agufa, Natalie Hazelwood, Nima Rahimi, Jensen Hu, Clare Wolfendale, and Lindsey White processed and analyzed the survey data. There was also an administrative data team as part of this research who collected, processed, and analyzed large volumes of data from State agencies with great care, thoughtfulness, and attention to detail. Clare Wolfendale led this team, which included Mia Monkovic, Moriah Schwartz, Brandan Pierce, Mindy Wong, Rebecca Franckle, Leah Jennings, Katherine Allison-Clark, Hena Matthias, Sam Meyer-Bonelli, Sophia Navarro, Tiffany Waits, Andrew Wen, Nia Atkins, Amy Harris, Ryan McInerney, and Kelsey Chesnut. Lara Hulseley and Sarah Forrestal provided valuable feedback on this report and other study materials. Sarah Forrestal and Betsy Santos provided expert guidance on survey work and analytic matters. Crystal Lennix and Anabelle League brought excellent management and organizational skills and unwavering positivity to the third year of this study. The research briefs were expertly formatted by Sheena Flowers and Stephanie Barna and edited by Effie Metropoulos. A team of creative and skilled designers created the engaging graphics featured in the research briefs. This team included Brigitte Tran, Yvonne Marki, and Laura Sarnoski.

This report would not have been possible without the cooperation of staff at SFAs and State agencies who participated in data collection and responded to the study team's questions, and their support networks in FNS Regional Offices nationwide. Thank you!
