

Appendix G

Children's dietary intakes and plate waste supplementary tables

This page has been left blank for double-sided copying.

Tables

Table G.1. Percentage of children ages 1 to 2 and 3 to 5 years in early child care programs consuming CACFP meals and snacks on a child care day	12
Table G.2. Percentage of 6 to 12 year olds in before and after school programs consuming CACFP meals and snacks on a child care day	13
Table G.3. Mean 24-hour intakes of USDA Food Pattern Food Groups among 1 to 2 year olds and 3 to 5 year olds in early child care programs on a child care day and non-child care day	14
Table G.4. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in before and after school programs on a child care day and non-child care day	15
Table G.5. Mean 24-hour intakes of calories, nutrients, and water among 1 to 2 year olds and 3 to 5 year olds in early child care programs on a child care day and non-child care day.....	16
Table G.6. Mean 24-hour intake of calories, nutrients and water consumed among 6 to 12 year olds in before and after school programs on a child care day and non-child care day	18
Table G.7. Mean 24-hour intakes of calories, nutrients and water among 1 to 2 year olds in child care centers on a child care day.....	20
Table G.8. Mean 24-hour intakes of calories, nutrients and water among 1 to 2 year olds in child care centers on a non-child care day.....	22
Table G.9. Mean 24-hour intakes of calories, nutrients and water among 3 to 5 year olds in child care centers on a child care day.....	24
Table G.10. Mean 24-hour intakes of calories, nutrients and water among 3 to 5 year olds in child care centers on a non-child care day.....	26
Table G.11. Mean 24-hour intakes of calories, nutrients and water among 1 to 2 year olds in Head Start centers on a child care day.....	28
Table G.12. Mean 24-hour intakes of calories, nutrients and water among 1 to 2 year olds in Head Start centers on a non-child care day.....	30
Table G.13. Mean 24-hour intakes of calories, nutrients and water among 3 to 5 year olds in Head Start centers on a child care day.....	32
Table G.14. Mean 24-hour intakes of calories, nutrients and water among 3 to 5 year olds in Head Start centers on a non-child care day.....	34
Table G.15. Mean 24-hour intakes of calories, nutrients and water among 1 to 2 year olds in early child care programs on a child care day.....	36
Table G.16. Mean 24-hour intakes of calories, nutrients and water among 1 to 2 year olds in early child care programs on a non-child care day	38

Table G.17. Mean 24-hour intakes of calories, nutrients and water among 3 to 5 year olds in early child care programs on a child care day.....	40
Table G.18. Mean 24-hour intakes of calories, nutrients and water among 3 to 5 year olds in early child care programs on a non-child care day	42
Table G.19. Mean 24-hour intakes of calories, nutrients and water among 6 to 12 year olds in at-risk afterschool centers on a child care day.....	44
Table G.20. Mean 24-hour intakes of calories, nutrients and water among 6 to 12 year olds in at-risk afterschool centers on a non-child care day	46
Table G.21. Mean 24-hour intakes of calories, nutrients and water among 6 to 12 year olds in outside-school-hours care centers on a child care day.....	48
Table G.22. Mean 24-hour intakes of calories, nutrients and water among 6 to 12 year olds in outside-school-hours care centers on a non-child care day	50
Table G.23. Mean 24-hour intakes of calories, nutrients and water among 6 to 12 year olds in before and after school programs on a child care day.....	52
Table G.24. Mean 24-hour intakes of calories, nutrients and water among 6 to 12 year olds in before and after school programs on a non-child care day.....	54
Table G.25. Mean 24-hour intakes of USDA Food Pattern Food Groups among 1 to 2 year olds in child care centers on a child care day	56
Table G.26. Mean 24-hour intakes of USDA Food Pattern Food Groups among 3 to 5 year olds in child care centers on a child care day	57
Table G.27. Mean 24-hour intakes of USDA Food Pattern Food Groups among 3 to 5 year olds in child care centers on a non-child care day	58
Table G.28. Mean 24-hour intakes of USDA Food Pattern Food Groups among 1 to 2 year olds in Head Start centers on a child care day	59
Table G.29. Mean 24-hour intakes of USDA Food Pattern Food Groups among 1 to 2 year olds in Head Start centers on a non-child care day	60
Table G.30. Mean 24-hour intakes of USDA Food Pattern Food Groups among 3 to 5 year olds in Head Start centers on a child care day	61
Table G.31. Mean 24-hour intakes of USDA Food Pattern Food Groups among 3 to 5 year olds in Head Start centers on a non-child care day	62
Table G.32. Mean 24-hour intakes of USDA Food Pattern Food Groups among 1 to 2 year olds in early child care programs on a child care day	63
Table G.33. Mean 24-hour intakes of USDA Food Pattern Food Groups among 1 to 2 year olds in early child care programs on a non-child care day	64

Table G.34. Mean 24-hour intakes of USDA Food Pattern Food Groups among 3 to 5 year olds in early child care programs on a child care day	65
Table G.35. Mean 24-hour intakes of USDA Food Pattern Food Groups among 3 to 5 year olds in early child care programs on a non-child care day	66
Table G.36. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in at-risk afterschool centers on a child care day.....	67
Table G.37. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in at-risk afterschool centers on a non-child care day.....	68
Table G.38. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in outside-school-hours care centers on a child care day.....	69
Table G.39. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in outside-school-hours care centers on a non-child care day	70
Table G.40. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in before and after school programs on a child care day.....	71
Table G.41. Mean 24-hour intakes of USDA Food Pattern Food Groups among 6 to 12 year olds in before and after school programs on a non-child care day	72
Table G.42. Percentage of 3 to 5 year olds in early child care programs with acceptable, inadequate, or excessive usual nutrient intakes on a child care day and a non-child care day.....	73
Table G.43. Mean usual intakes of calories and nutrients among 3 to 5 year olds in early child care programs on a child care day and non-child care day	75
Table G.44. Mean usual intakes of calories (energy) for 3 to 5 year olds in early child care programs on a child care day and non-child care day and estimated energy requirements.....	77
Table G.45. Means and distributions of usual intakes of calories and nutrients among 3 to 5 year olds in early child care programs on a child care day	78
Table G.46. Means and distributions of usual intakes of calories and nutrients among 3 to 5 year olds in early child care programs on a non-child care day	80
Table G.47. Mean usual intakes of USDA Food Pattern food groups among 3 to 5 year olds in early child care programs on a child care day and non-child care day.....	82
Table G.48. Means and distributions of usual intakes of USDA Food Pattern food groups among 3 to 5 year olds in early child care programs on a child care day	83
Table G.49. Means and distributions of usual intakes of USDA Food Pattern food groups among 3 to 5 year olds in early child care programs on a non-child care day	84

Table G.50. Mean amount of each CACFP meal component consumed at breakfast and the percentage of the minimum requirement consumed for children ages 1 to 2 and 3 to 5 years in early child care programs.....	85
Table G.51. Mean amount of each CACFP meal component consumed at morning snack and the percentage of the minimum requirement consumed for children ages 1 to 2 and 3 to 5 years in early child care programs.....	87
Table G.52. Mean amount of each CACFP meal component consumed at lunch and the percentage of the minimum requirement consumed for children ages 1 to 2 and 3 to 5 years in early child care programs.....	89
Table G.53. Mean amount of each CACFP meal component consumed at afternoon snack and the percentage of the minimum requirement consumed for children ages 1 to 2 and 3 to 5 years in early child care programs.....	91
Table G.54. Mean amount of each CACFP meal component consumed by 6 to 12 year old children at afternoon snack and the percentage of the minimum requirement consumed in before and after school programs	93
Table G.55. Mean amount of each CACFP meal component consumed by 6 to 12 year old children at supper and the percentage of the minimum requirement consumed in before and after school programs.....	94
Table G.56. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for 24-hour intakes for 2 year old children in early child care programs – child care days versus non-child care days	95
Table G.57. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for 24-hour intakes for 3 to 5 year old children in early child care programs – child care days versus non-child care days	96
Table G.58. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for 24-hour intakes for 2 to 5 year old children in early child care programs – child care days versus non-child care days	98
Table G.59. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for 24-hour intakes for 6 to 12 year old children in before and after school programs – child care days versus non-child care days	100
Table G.60. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for CACFP breakfasts consumed by children in early child care programs on a child care day	102
Table G.61. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for CACFP lunches consumed by children in early child care programs on a child care day	104
Table G.62. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for CACFP snacks consumed by children in early child care programs on a child care day.....	106

Table G.63. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for all CACFP meals and snacks consumed by children in early child care programs on a child care day	108
Table G.64. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for CACFP snacks consumed by children in before and after school programs on a child care day.....	110
Table G.65. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for all CACFP meals and snacks consumed by children in before and after school programs on a child care day	111
Table G.66. Mean percentage contribution of CACFP breakfasts to 24-hour intakes of calories and nutrients on a child care day for children ages 1 to 2 and 3 to 5 years in early child care programs.....	112
Table G.67. Mean percentage contribution of CACFP morning snacks to 24-hour intakes of calories and nutrients on a child care day for children ages 1 to 2 and 3 to 5 years in early child care programs.....	114
Table G.68. Mean percentage contribution of CACFP lunches to 24-hour intakes of calories and nutrients on a child care day for children ages 1 to 2 and 3 to 5 years in early child care programs.....	116
Table G.69. Mean percentage contribution of CACFP afternoon snacks to 24-hour intakes of calories and nutrients on a child care day for children ages 1 to 2 and 3 to 5 years in early child care programs.....	118
Table G.70. Mean percentage contribution of all CACFP snacks to 24-hour intakes of calories and nutrients on a child care day for children ages 1 to 2 and 3 to 5 years in early child care programs.....	120
Table G.71. Mean percentage contribution of all CACFP meals and snacks to 24-hour intakes of calories and nutrients on a child care day for children ages 1 to 2 and 3 to 5 years in early child care programs.....	122
Table G.72. Mean percentage contribution of CACFP afternoon snacks to 24-hour intakes of calories and nutrients on a child care day for 6 to 12 year olds in before and after school programs.....	124
Table G.73. Mean percentage contribution of CACFP suppers to 24-hour intakes of calories and nutrients on a child care day for 6 to 12 year olds in before and after school programs.....	126
Table G.74. Mean percentage contribution of all CACFP meals and snacks to 24-hour intakes of calories and nutrients on a child care day for 6 to 12 year olds in before and after school programs.....	128
Table G.75. Mean percentage contribution of all CACFP meals and snacks to 24-hour intakes of calories and nutrients on a child care day in early child care programs, by part- or full-time attendance	130
Table G.76. Multivariate analysis of total HEI scores on child and provider characteristics, across all CACFP meals and snacks	132

Table G.77. Multivariate analysis of total HEI scores on household participation in food assistance programs.....	133
Table G.78. Mean total Healthy Eating Index-2015 scores for 24-hour intakes among 3 to 5 year-olds in child care centers and Head Start centers in SNACS-I and SNACS-II on a child care day	134
Table G.79. Mean total Healthy Eating Index-2015 scores for 24-hour intakes among 6 to 12 year-olds in before and after school programs in SNACS-I and SNACS-II on a child care day	135
Table G.80. Meal service type and staff meal time practices in early child care programs, at breakfast.....	136
Table G.81. Meal service type and staff meal time practices in early child care programs, at morning snack	137
Table G.82. Meal service type and staff meal time practices in early child care programs, at lunch.....	138
Table G.83. Meal service type and staff meal time practices in early child care programs, at afternoon snack	139
Table G.84. Meal service type and staff meal time practices in before and after school programs, at afternoon snack.....	140
Table G.85. Meal service type and staff meal time practices in before and after school programs, at supper	141
Table G.86. Mean and distribution of breakfast start and end times in early child care programs	142
Table G.87. Mean and distribution of morning snack start and end times in early child care programs.....	143
Table G.88. Mean and distribution of lunch start and end times in early child care programs.....	144
Table G.89. Mean and distribution of afternoon snack start and end times in early child care programs	145
Table G.90. Mean and distribution of afternoon snack start and end times in before and after school programs.....	146
Table G.91. Mean and distribution of supper start and end times in before and after school programs.....	147
Table G.92. Foods wasted at breakfast in early child care programs.....	148
Table G.93. Foods wasted at morning and afternoon snack in early child care programs.....	149
Table G.94. Foods wasted at lunch in early child care programs	150
Table G.95. Foods wasted at afternoon snack in before and after school programs.....	152
Table G.96. Foods wasted at supper in before and after school programs	153
Table G.97. Calories and nutrients served and wasted at breakfast in early child care programs among 1 to 2 year olds.....	155
Table G.98. Calories and nutrients served and wasted at breakfast in early child care programs among 3 to 5 year olds.....	157

Table G.99. Calories and nutrients wasted at morning and afternoon snack in early child care programs among 1 to 2 year olds	159
Table G.100. Calories and nutrients wasted at morning and afternoon snack in early child care programs among 3 to 5 year olds	161
Table G.101. Calories and nutrients wasted at lunch in early child care programs among 1 to 2 year olds	163
Table G.102. Calories and nutrients wasted at lunch in early child care programs among 3 to 5 year olds	165
Table G.103. Calories and nutrients served and wasted at breakfast in early child care programs	167
Table G.104. Calories and nutrients wasted at morning and afternoon snack in early child care programs.....	169
Table G.105. Calories and nutrients wasted at lunch in early child care programs.....	171
Table G.106. Foods wasted at breakfast in early child care programs in SNACS-I and SNACS-II.....	173
Table G.107. Foods wasted at lunch in early child care programs in SNACS-I and SNACS-II	174
Table G.108. Calories wasted at breakfast in early child care programs in SNACS-I and SNACS-II.....	175
Table G.109. Calories wasted at lunch in early child care programs in SNACS-I and SNACS-II	176
Table G.110. Multivariate analysis of plate waste on key child and program environment characteristics, breakfast percentage of calories wasted	177
Table G.111. Multivariate analysis of plate waste on key child and program environment characteristics, breakfast percentage of fruit wasted	178
Table G.112. Multivariate analysis of plate waste on key child and program environment characteristics, lunch percentage of calories wasted	179
Table G.113. Multivariate analysis of plate waste on key child and program environment characteristics, lunch percentage of fruit wasted	180
Table G.114. Multivariate analysis of plate waste on key child and program environment characteristics, lunch percentage of vegetables wasted	181
Table G.115. Multivariate analysis of plate waste on key child and program environment characteristics, snack percentage of calories wasted.....	183
Table G.116. Multivariate analysis of plate waste on key child and program environment characteristics, snack percentage of fruit wasted.....	184
Table G.117. Multivariate analysis of plate waste on key child and program environment characteristics, supper percentage of calories wasted	185
Table G.118. Multivariate analysis of plate waste on key child and program environment characteristics, supper percentage of fruit wasted	186

Table G.119. Multivariate analysis of plate waste on key child and program environment characteristics, supper percentage of vegetables wasted	187

Afternoon snack	93.6	82.0*	84.2	71.4	94.5	78.0~	93.5	79.0
Any snack	94.1	86.8***	84.2†	71.8+++	99.0##	90.4~	95.5	84.2
Supper	5.3^	3.2^	0.0	0.0	14.4^~	8.4^~	8.5^	3.4^
Number of early child care programs	44	78	21	105	42	51	107	234
Number of children in the programs	143	286	69	493	64	72	276	851

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Difference between children in child care centers and Head Start centers is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level. Difference between children in child care centers and family day care homes is significantly different from zero at the ###0.001 level, ##0.01 level, or #0.05 level. Difference between children in Head Start centers and family day care homes is significantly different from zero at the +++0.001 level, ++0.01 level, or +0.05 level.

^ Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

~ Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

CACFP = Child and Adult Care Food Program.

Table G.2. Percentage of 6 to 12 year olds in before and after school programs consuming CACFP meals and snacks on a child care day

	At-risk afterschool centers	Outside-school-hours care centers	All
Breakfast	0.0**	29.0^	2.4^
Morning snack	0.0	0.0	0.0

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in before and after school programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Before and after school programs include at-risk afterschool centers and outside-school-hours care centers.

In before and after school programs, some children ages 6 to 12 had incomplete 24-hour in-care-day dietary recalls because no foods were reported during the school day. These students were excluded from analyses based on intakes over 24 hours.

^a Includes all fresh, frozen, canned, and dried fruits and fruit juices.

^b Protein foods exclude legumes because legumes are counted as vegetables in this table.

Difference between child care day and non-child care day is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level.

[^] Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

g = grams, kcal = kilocalorie, oz = ounce, USDA = United States Department of Agriculture.

Table G.5. Mean 24-hour intakes of calories, nutrients, and water among 1 to 2 year olds and 3 to 5 year olds in early child care programs on a child care day and non-child care day

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Early child care programs include child care centers, Head Start centers, and family day care homes.

Difference between child care day and non-child care day is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level.

AT = alpha-tocopherol, DFE = dietary folate equivalents, fl oz = fluid ounce, g = grams, kcal = kilocalorie, mcg = micrograms, mg = milligrams, RAE = retinol activity equivalents.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in before and after school programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Before and after school programs include at-risk afterschool centers and outside-school-hours care centers.

In before and after school programs, some children ages 6 to 12 had incomplete 24-hour in-care-day dietary recalls because no foods were reported during the school day. These students were excluded from analyses based on intakes over 24 hours.

Difference between child care day and non-child care day is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level.

AT = alpha-tocopherol, DFE = dietary folate equivalents, fl oz = fluid ounce, g = grams, kcal = kilocalorie, mcg = micrograms, mg = milligrams, RAE = retinol activity equivalents.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

~ Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

AT = alpha-tocopherol, DFE = dietary folate equivalents, fl oz = fluid ounce, g = grams, kcal = kilocalorie, mcg = micrograms, mg = milligrams, RAE = retinol activity equivalents, SD = standard deviation.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

In before and after school programs, some children ages 6 to 12 had incomplete 24-hour in-care-day dietary recalls because no foods were reported during the school day. These students were excluded from analyses based on intakes over 24 hours.

~ Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

AT = alpha-tocopherol, DFE = dietary folate equivalents, fl oz = fluid ounce, g = grams, kcal = kilocalorie, mcg = micrograms, mg = milligrams, RAE = retinol activity equivalents, SD = standard deviation.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Early child care programs include child care centers, Head Start centers, and family day care homes.

^a Includes all fresh, frozen, canned, and dried fruits and fruit juices.

^b Protein foods exclude legumes because legumes are counted as vegetables in this table.

- Usual intake distributions could not be reliably estimated because so few children consumed these foods.

g = grams, kcal = kilocalorie, oz = ounce, SE = standard error, USDA = United States Department of Agriculture.

Table G.50. Mean amount of each CACFP meal component consumed at breakfast and the percentage of the minimum requirement consumed for children ages 1 to 2 and 3 to 5 years in early child care programs

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Under CACFP meal pattern requirements meat/meat alternates can replace grains at breakfast up to three times per week.

The analysis is based on foods actually consumed by children. It does not include foods served to children that were not consumed

- Indicates a minimum amount is not required for the meal or snack.

Appendix G. Children's dietary intakes and plate waste supplementary tables

Difference between children in child care centers and Head Start centers is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level. Difference between children in child care centers and family day care homes is significantly different from zero at the ###0.001 level, ##0.01 level, or #0.05 level. Difference between children in Head Start centers and family day care homes is significantly different from zero at the ++0.001 level, +0.01 level, or +0.05 level.

^ Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

~ Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Mean scores could not be reliably estimated for 2 year olds by provider type.

Appendix G. Children's dietary intakes and plate waste supplementary tables

Difference between children in child care centers and Head Start centers is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level. Difference between children in child care centers and family day care homes is significantly different from zero at the ###0.001 level, ##0.01 level, or #0.05 level. Difference between children in Head Start centers and family day care homes is significantly different from zero at the ++0.001 level, +0.01 level, or +0.05 level.

^ Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

CACFP = Child and Adult Care Food Program.

Table G.64. Mean Healthy Eating Index-2015 scores and percentage of maximum scores for CACFP snacks consumed by children in before and after school programs on a child care day

Appendix G. Children's dietary intakes and plate waste supplementary tables

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in before and after school programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

In before and after school programs, some children ages 6 to 12 had incomplete 24-hour in-care-day dietary recalls because no foods were reported during the school day. These students were excluded from analyses based on intakes over 24 hours.

Difference between children in at-risk afterschool centers and outside-school-hours care centers is significantly different from zero at the ***0.001 level, ** 0.01 level, or * 0.05 level.

~ Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

CACFP = Child and Adult Care Food Program.

Table G.75. Mean percentage contribution of all CACFP meals and snacks to 24-hour intakes of calories and nutrients on a child care day in early child care programs, by part- or full-time attendance

Appendix G. Children's dietary intakes and plate waste supplementary tables

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Form, ASA24 Recall, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all children in early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Early child care programs include child care centers, Head Start centers, and family day care homes. Early child care programs may also provide care to older children.

Difference between children with full-time attendance and part-time attendance is significantly different from zero at the ***0.001 level, ** 0.01 level, or * 0.05 level.

^ Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

CACFP = Child and Adult Care Food Program.

Table G.76. Multivariate analysis of total HEI scores on child and provider characteristics, across all CACFP meals and snacks

	Estimate (SE)
Teachers sat with children meal time	4.4 (3.75)
Teachers drank the same drinks as children at meal time	-3.7 (2.76)
Teachers ate the same food as the children at meal time	2.59 (3.98)
Meal service type - preplated foods	-0.59 (2.57)
Meal service type - cafeteria style	-2.74 (2.47)
Meal service type - family style	-3.49 (2.68)
Meals: Breakfast, lunch, dinner and possibly snacks	-0.41 (4)
Meals: Other	-0.01 (3.12)
Meal duration in minutes	0.01 (0.15)
Early child care indicator	13.12 *** (3.67)
Number of children	1033

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet, Parent Child Interview and Provider Survey, winter through summer, 2023.

Coefficient estimates for selected covariates reported (standard errors in parentheses).

HEI = Health Eating Index. HEI 2015 Index scores used as model dependent variable.

Omitted categories Meals: Breakfast, lunch & snacks

* Significantly different from zero at the 0.10 level, two-tailed test.

** Significantly different from zero at the 0.05 level, two-tailed test.

*** Significantly different from zero at the 0.01 level, two-tailed test.

Table G.77. Multivariate analysis of total HEI scores on household participation in food assistance programs

	Estimate (SE)
Participation in food assistance programs: SNAP, WIC, free or reduced lunch	4.23 (9.42)
Participation in food assistance programs: SNAP, WIC , food pantry or FDPIR	13.89 *** (4.26)
Participation in food assistance programs: SNAP, WIC	2.39 (1.81)
Participation in food assistance programs: SNAP	1.83 (1.63)
Participation in food assistance programs: WIC, free or reduced price lunch, food pantry or FDPIR	-12.29 (8.9)
Participation in food assistance programs: WIC, free or reduced price lunch	-11.25 *** (3.88)
Participation in food assistance programs: WIC	4.99 ** (1.86)
Participation in food assistance programs: free or reduced price lunch, food pantry or FDPIR	4.52 (3.57)
Participation in food assistance programs: free or reduced price lunch	0.67 (1.95)
Participation in food assistance programs: food pantry or FDPIR	5.89 (6.14)
Number of children	1157

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet, Parent Child Interview, winter through summer, 2023.

Coefficient estimates for selected covariates reported (standard errors in parentheses).

HEI = Health Eating Index. HEI 2015 Index scores used as model dependent variable.

Omitted category for food assistance participation: No programs

* Significantly different from zero at the 0.10 level, two-tailed test.

** Significantly different from zero at the 0.05 level, two-tailed test.

*** Significantly different from zero at the 0.01 level, two-tailed test.

Table G.78. Mean total Healthy Eating Index-2015 scores for 24-hour intakes among 3 to 5 year-olds in child care centers and Head Start centers in SNACS-I and SNACS-II on a child care day

	SNACS-I	SNACS-II	Difference (SNACS-II - SNACS-I)
Mean total score (out of 100)	65.0	67.4	2.4
Number of children	1,597	779	

Source: Study of Nutrition and Activity in Child Care Settings (SNACS-I), Meal Observation Booklet, winter through summer, 2017 and Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet, ASA24 Recall, winter through summer, 2023.

SNACS-I and SNACS-II tabulations are weighted to be nationally representative of all early child care programs participating in the Child and Adult Care Food Program in Program Years 2016–2017 and 2022–2023, respectively. Estimates are percentages unless otherwise noted.

Early child care programs include child care centers and Head Start centers.

Difference between SNACS-I estimate and SNACS-II estimate is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level.

Table G.79. Mean total Healthy Eating Index-2015 scores for 24-hour intakes among 6 to 12 year-olds in before and after school programs in SNACS-I and SNACS-II on a child care day

	SNACS-I	SNACS-II	Difference (SNACS-II - SNACS-I)
Mean total score (out of 100)	64.7	65.3	0.6
Number of children	356	294	

Source: Study of Nutrition and Activity in Child Care Settings (SNACS-I), Meal Observation Booklet, winter through summer, 2017 and Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet, ASA24 Recall, winter through summer, 2023.

SNACS-I and SNACS-II tabulations are weighted to be nationally representative of all before and after school programs participating in the Child and Adult Care Food Program in Program Years 2016–2017 and 2022–2023, respectively. Estimates are percentages unless otherwise noted.

Before and after school programs include at-risk afterschool centers and outside-school-hours care centers.

Difference between SNACS-I estimate and SNACS-II estimate is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level.

Table G.80. Meal service type and staff meal time practices in early child care programs, at breakfast

	Child care centers	Head Start centers	Family day care homes	All
Meal service types observed at breakfast				
Family style	21.4^	48.1	-	13.9
Cafeteria style	58.7	48.7	57.0~	56.7

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet and Menu Survey, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023. Estimates are percentages unless otherwise noted.

Indented rows show minor food groups served in at least 5 percent of plates for program types included in this table. Minor food groups are listed in descending order based on the frequency served to children.

Estimates for the percent of plates include all observed children. Estimates for the percent wasted include only children who were served the food.

Difference between 1 to 2 year olds and 3 to 5 year olds is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level.

^{*} Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

[~] Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet and Menu Survey, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all before and after school programs participating in the Child and Adult Care Food Program in Program Year 2022–2023. Estimates are percentages unless otherwise noted.

Indented rows show minor food groups served in at least 5 percent of plates for program types included in this table. Minor food groups are listed in descending order based on the frequency served to children.

Estimates for the percent of plates include all observed children. Estimates for the percent wasted include only children who were served the food.

Difference between at-risk afterschool centers and outside-school-hours care centers is significantly different from zero at the ***0.001 level, ** 0.01 level, or * 0.05 level.

^ Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

~ Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Estimates include only children who were served the nutrient.

Difference between child care centers and Head Start centers is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level. Difference between child care centers and family day care homes is significantly different from zero at the ###0.001 level, ##0.01 level, or #0.05 level. Difference between Head Start centers and family day care homes is significantly different from zero at the +++0.001 level, ++0.01 level, or +0.05 level.

^{*} Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

[~] Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

AT = alpha-tocopherol, g = grams, kcal = kilocalorie, mcg = micrograms, mg = milligrams, RAE = retinol activity equivalents, µg = microgram.

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Meal Observation Booklet, winter through summer, 2023.

Tabulations are weighted to be nationally representative of all early child care programs participating in the Child and Adult Care Food Program in Program Year 2022–2023.

Estimates include only children who were served the nutrient.

Difference between child care centers and Head Start centers is significantly different from zero at the ***0.001 level, **0.01 level, or *0.05 level. Difference between child care centers and family day care homes is significantly different from zero at the ###0.001 level, ##0.01 level, or #0.05 level. Difference between Head Start centers and family day care homes is significantly different from zero at the +++0.001 level, ++0.01 level, or +0.05 level.

[^] Estimate is considered imprecise because the standard error is more than 30 percent of the estimate.

[~] Estimate has an effective sample size of fewer than 30 observations. The effective sample size is calculated as the sample size divided by the design effect for each estimate.

AT = alpha-tocopherol, g = grams, kcal = kilocalorie, mcg = micrograms, mg = milligrams, RAE = retinol activity equivalents, µg = microgram.

Table G.110. Multivariate analysis of plate waste on key child and program environment characteristics, breakfast percentage of calories wasted

	Estimate (SE)
Child's age during target week	-0.1 (1.52)
Meal duration (in minutes)	-0.11 (0.22)
Teachers sat with children at observed meal	0.72 (6.53)
Teachers ate the same food as the children at observed meal	-2.81 (5.05)
Number of children	826

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Menu Survey and Provider Survey, winter through summer, 2023.

Coefficient estimates for selected covariates reported (standard errors in parentheses).

* Significantly different from zero at the 0.10 level, two-tailed test.

** Significantly different from zero at the 0.05 level, two-tailed test.

*** Significantly different from zero at the 0.01 level, two-tailed test.

SE = standard error

Table G.111. Multivariate analysis of plate waste on key child and program environment characteristics, breakfast percentage of fruit wasted

	Estimate (SE)
Child's age during target week	2.64 (1.65)
Meal duration (in minutes)	0.18 (0.27)
Teachers sat with children at observed meal	-6.18 (7.44)
Teachers ate the same food as the children at observed meal	4.26 (8.62)
Second servings are allowed: Grain/bread	-8.19 (5.64)
Teachers drank the same drinks as children at observed meal	5.07 (6.45)
Provider Type: Head Start centers	-0.83 (3.6)
Region: Southeast	8.35 (6.29)
Number of children	825

Source: Second Study of Nutrition and Activity in Child Care Settings (SNACS-II), Menu Survey and Provider Survey, winter through summer, 2023.

Coefficient estimates for selected covariates reported (standard errors in parentheses).

* Significantly different from zero at the 0.10 level, two-tailed test.

** Significantly different from zero at the 0.05 level, two-tailed test.

*** Significantly different from zero at the 0.01 level, two-tailed test.

SE = standard error

Table G.112. Multivariate analysis of plate waste on key child and program environment characteristics, lunch percentage of calories wasted

	Estimate (SE)
Child's age during target week	-1.23 (0.99)
Meal duration (in minutes)	-0.26 * (0.15)
Teachers sat with children at observed meal	1.8 (4.57)
Teachers ate the same food as the children at observed meal	-7.09 (4.27)
Number of minutes of physical activity (outdoor + indoor) before lunch	-0.13 *** (0.04)
Number of minutes of physical activity (outdoor + indoor) after lunch	0.06 * (0.03)
