

SNAP EBT Receipt Requirements

Important Reminder

Supplemental Nutrition Assistance Program (SNAP) retailers must provide receipts at checkout for SNAP Electronic Benefit Transfer (EBT) transactions.

The receipt must include:

- Store name
- Store address
- Remaining SNAP EBT account balance or, if required by your state, an insufficient funds message
- Transaction type
- Transaction amount
- Date of transaction
- SNAP customer’s abbreviated EBT card number

SNAP Retailers must not:

- Collect, possess, maintain, log, or track EBT Card numbers in whole or in part, for any reason
- Print the SNAP customer’s name on the receipt
- Print the full EBT Card primary account number (PAN) on the receipt

SNAP retailers are responsible for ensuring point-of-sale (POS) terminals are programmed correctly. Make sure that your POS can process SNAP EBT transactions including performing refunds, key-entered transactions, SNAP balance inquiries, and voiding latest transaction.
